PROFESSIONAL PROFILE

Computer Science graduate with practical experience in IT support, Linux/Unix environments, network administration, cybersecurity monitoring, software engineering, and system testing. Experienced in troubleshooting hardware and software issues, supporting users, maintaining cloud-based systems, reviewing application quality, documenting procedures, and contributing to security operations. Hands-on exposure through The Room and Konza Technopolis, complemented by full-stack projects involving authentication, access control, audit logging, databases, and transactional systems. Seeking to contribute reliable technical support while developing deeper experience with technology systems in a safety-, service-, and operations-focused aviation environment.

TECHNICAL SKILLS

IT Support & Systems: Hardware/software troubleshooting, user support, system performance optimization, Linux/Unix administration, technical documentation

Networking & Security: TCP/IP, DNS, vulnerability assessment, incident analysis, secure coding, access control, audit logging, endpoint security

Software & Web: Python, PHP/Laravel, JavaScript, React, Vue.js, Node.js, REST APIs, Flutter

Cloud, Data & Quality: AWS, Docker, Git/GitHub, MySQL, PostgreSQL, MongoDB, Firebase, UAT/SIT testing, defect documentation

PROFESSIONAL EXPERIENCE

ERP Production & UX Tester | [Makao ERP](#) — Contract

Sep 2026 – Present

- Conduct end-to-end ERP/POS production testing, UX workflow validation, and regression retesting in an Ubuntu/Linux environment.
- Identify, document, and track system defects, detailing severity, test evidence, and expected vs. actual behavior.
- Collaborate closely with software developers and QA testers to ensure system reliability and seamless operational performance.

IT Support & Software Fellow | [ALX - The Room](#) — Nairobi, Kenya

Nov 2022 – Feb 2024

- Provided hardware and software troubleshooting, system performance optimization, and operational user support.
- Supported cloud maintenance activities, reviewed code quality, and helped resolve workflow bottlenecks.
- Worked in a collaborative technical environment requiring clear communication, rapid problem-solving, and responsive user support.

Software Engineer Attaché | [Konza Technopolis](#) — Makeni, Kenya

May 2023 – Nov 2023

- Developed enterprise web applications using Laravel, JavaScript, and REST APIs.
- Participated in CERT-KE and CSOC-related activities including vulnerability assessments, incident analysis, and network security controls.
- Executed UAT/SIT system testing and documented technical operating procedures.

SELECTED TECHNICAL PROJECTS

- CheckMate Management System** — [Node.js](#) / [Firebase](#): QR-driven attendance platform with role-based access control, real-time audit logs, authentication, and live operational metrics.
- Gas Station POS & Inventory System** — [Flutter](#) / [Node.js](#): Full-stack management solution involving real-time analytics, inventory logging, and transactional workflows.
- CareerPortal Platform** — [Laravel](#) / [MySQL](#): Web platform featuring secure authentication, database search functionality, and responsive frontend UI.

EDUCATION & PROFESSIONAL STRENGTHS

B.Sc. Computer Science | [Alupe University](#), Busia, Kenya

2021–2025

Relevant Coursework: Computer Networks, Linux Administration, Cybersecurity, Software Engineering, Database Systems, Operating Systems, Data Structures.

Strengths: Communication • Teamwork • Learning Agility • Technical Problem-Solving • Attention to Detail • Documentation • Professionalism • User-Focused Support

REFERENCES
