linkedin.com/in/donald-mwanga-4bb5abba

Professional Profile: Computer Science graduate with hands-on expertise in full-stack web engineering, network administration, cybersecurity monitoring, and IT system support. Proven experience at Konza Technopolis and The Room in optimizing web applications, securing network endpoints, and providing technical user support.

TECHNICAL EXPERIENCE

IT Support & Software Fellow 11/2022 – 02/2024
The Room • Nairobi, Kenya

- Provide hardware/software debugging, system performance optimization, and operational user support.
- Support cloud maintenance, conduct code quality reviews, and resolve workflow bottlenecks.

Software Engineer Attaché 05/2023 – 11/2023
Konza Technopolis • Makueni, Kenya

- Developed enterprise web applications using Laravel, JavaScript, and REST APIs.
- Participated in CERT-KE & CSOC operations: vulnerability assessments, incident analysis, and network security controls.
- Executed UAT/SIT system testing and documented technical operating procedures.

KEY TECHNICAL PROJECTS

CareerPortal Platform **Laravel / MySQL**
Job host platform featuring secure authentication, fast database search algorithms, and responsive frontend UI.

CheckMate Management System **Node.js / Firebase**
QR-driven check-in platform with real-time audit logs, role-based access control, and live streaming metrics.

Gas Station POS & Inventory System **Flutter / Node.js**
Full-stack management solution with real-time analytics, inventory logging, and transactional security.

EDUCATION

B.Sc. in Computer Science 2021 – 2025
Alupe University, Busia, Kenya
Coursework: Computer Networks, Linux Admin, Cybersecurity, Software Engineering, Database Systems, Operating Systems, AI, Data Structures.

CORE COMPETENCIES

Full-Stack Development

PHP Laravel JavaScript
React Vue.js Node.js
Python

IT, Cloud & DevOps

Linux/Unix Networking
Docker AWS Git/GitHub

Cybersecurity & Data

Secure Coding Access Control
Audit Logging Data Analysis

Databases

MySQL PostgreSQL MongoDB
Firebase
