PROFESSIONAL SUMMARY

Full-Stack Developer and Senior-Level Laravel Engineer with 3+ years of professional experience building scalable web and mobile applications. Specialized in Laravel (9/10/11), PHP, MySQL, RESTful APIs, and modern frontend technologies including React and Flutter. Strong expertise in MVC architecture, Eloquent ORM, authentication systems, database optimization, and clean architecture principles. Proven ability to independently deliver production-ready features, refactor and optimize legacy systems, and align engineering decisions with measurable business and user impact. Experienced collaborating with cross-functional teams in Agile environments and building systems designed for scalability, reliability, and long-term maintainability.

CORE TECHNICAL SKILLS

- Backend: PHP (Laravel 9/10/11), MVC Architecture, Eloquent ORM, RESTful APIs, Authentication & RBAC, Queues, Events, Service Providers
- Database: MySQL, Query Optimization, Indexing, Schema Design, Performance Tuning
- Frontend: React.js, Flutter, Vue.js, JavaScript (ES6+), HTML5, CSS3
- Testing & Quality: PHPUnit, Debugging, Code Reviews, Secure Coding (OWASP principles)
- Tools & Workflow: Git, GitHub, Postman, Agile/Scrum, Deployment & Production Debugging
- Architecture & Performance: API Design, Modular Code Structure, Caching Concepts (Redis fundamentals)

PROFESSIONAL EXPERIENCE

Software Engineer – Konza Technopolis Development Authority (May 2023 – August 2024) • Led backend feature implementation and system optimization across enterprise platforms. • Designed scalable Laravel modules aligned with clean architecture and MVC principles. • Developed RESTful APIs supporting frontend integrations and internal systems. • Optimized database queries improving performance and reliability. • Participated in architecture discussions, code reviews, and cross-team collaboration. • Reduced recurring system issues through structured debugging and preventive improvements.

Cloud Engineer Intern / IT Support Specialist – Iwave Africa Limited (May 2021 – May 2023) • Supported cloud-hosted backend systems and infrastructure maintenance. • Implemented automation scripts reducing operational inefficiencies. • Strengthened system stability through proactive monitoring and troubleshooting. • Applied secure system configuration and access management practices.

KEY PROJECTS

CareerPortal – Laravel Recruitment Platform • Architected a multi-role job hosting platform using Laravel 11 and MySQL. • Built secure authentication, RBAC, REST APIs, and optimized database queries. • Structured modular, testable codebase for scalability. VisiTrack – Digital Visitor Management System • Engineered backend workflows for visitor check-in, automated notifications, and secure tracking. • Designed normalized database schemas and validation processes. CheckMate – Smart Attendance System • Designed backend logic for attendance validation and eligibility calculation. • Built scalable APIs supporting real-time student-lecturer interactions. Librico – Desktop Library Management System • Developed structured data management workflows and backend APIs. • Improved operational efficiency through system digitization.

EDUCATION

Bachelor of Science in Computer Science – Alupe University (Sep 2021 – Nov 2025) Relevant Coursework: Software Engineering, Database Systems, Computer Networks, Data Structures & Algorithms, Cybersecurity Fundamentals

CERTIFICATIONS

• Google IT Support Professional Certificate • Google Automation with Python (In Progress)
