PROFESSIONAL SUMMARY

Prompt Engineer and Software Engineer with hands-on experience designing, testing, and optimizing prompts and intelligent workflows for Large Language Models (LLMs). Strong foundation in computer science, IT support, networking, and cybersecurity. Proven ability to analyze system behavior, refine outputs, and improve accuracy, relevance, and safety. Experienced in automation, full-stack development, and AI-assisted systems using JavaScript, Python, and Node.js. Passionate about applying AI, secure systems design, and software engineering best practices to real-world problems.

CORE SKILLS

Prompt Engineering & AI

- Prompt design & optimization (zero-shot, few-shot, chain-of-thought)
- Context management and instruction tuning
- AI output evaluation, hallucination reduction, and bias analysis
- Prompt templates, prompt libraries, and best practices
- LLM behavior analysis and safety refinement

Software Engineering

- Full-stack web & mobile development
- JavaScript (Node.js), Python
- REST APIs, automation, and system integration
- System design, testing, debugging, and documentation

IT Support, Networking & Cybersecurity

- Technical troubleshooting and user support
- Windows and Linux operating systems
- TCP/IP networking fundamentals and system administration
- Cloud computing fundamentals and automation basics
- Cybersecurity principles and secure system practices

PROFESSIONAL EXPERIENCE

Software Engineer – Konza Technopolis Development Authority (May 2023 – August 2024)

- Supported development, maintenance, and optimization of internal digital systems.
- Collaborated with engineers and stakeholders to deliver reliable technical solutions.
- Evaluated system outputs and refined workflows for improved accuracy and usability.
- Assisted in documentation, testing, and user support for enterprise systems.
- Applied analytical and security-aware thinking to system improvements.

Cloud Engineer Intern / IT Support Specialist – Iwave Africa Limited (May 2021 – May 2023)

- Assisted with cloud infrastructure support and IT operations.
- Provided technical troubleshooting, system configuration, and user support.
- Supported automation tasks and scripting for system optimization.
- Gained practical experience in networking fundamentals and cybersecurity best practices.

KEY PROJECTS

CheckMate – Intelligent Attendance Management System

Flutter & Node.js based system with Firebase backend.

- Designed structured workflows and validation logic for attendance verification.

- Implemented automated attendance analysis and notification logic.
- Focused on predictable behavior and reliable system outputs.

Librico – Desktop Library Management System

Electron & React desktop application.

- Designed structured data flows and optimized application responses.
- Improved data accuracy and operational efficiency.

AI Prompt Engineering Practice (Independent)

- Designed, tested, and refined prompts for LLMs to generate accurate and safe outputs.
- Experimented with zero-shot, few-shot, and chain-of-thought prompting techniques.
- Built reusable prompt templates and documented best practices.
- Evaluated AI responses and iterated to reduce errors and hallucinations.

EDUCATION

Bachelor of Science in Computer Science – Alupe University (Sep 2021 – Nov 2025)

Relevant areas: Artificial Intelligence, Software Engineering, Computer Networks, Data Structures & Algorithms.

CERTIFICATIONS & TRAINING

- Google IT Support Professional Certificate
- Google Automation with Python (In Progress)
- Google Digital Marketing & E-commerce (In Progress)
- Ongoing self-study in Prompt Engineering, Networking, and Cybersecurity

ADDITIONAL INFORMATION

Strong communication skills | Analytical mindset | Fast learner | Remote collaboration experience
